

DOORscreen - digital welcoming and guiding for visitors

Electrosuisse, Fehraltorf, Switzerland

Welcoming and guiding from one source

Discover the elegance of multimedia welcoming and guiding for visitors. Do you want to ease the burden on your reception personnel? Provide up-to-date information for your guests?

Comfortable guiding for visitors

Your guest will be guided to his meeting - from the overview screen at reception to the electronic door sign. A personal greeting for each guest and relief for your reception personnel at the same time.

agreeable and comfortable

Simplified schedule administration

Enter your schedule comfortably and easily into DOORscreen's online platform. Similarly to Outlook, you can enter your appointment and it will appear automatically on your screen or door sign.

simple and clear

Flexible combination

With screenFOOD® you can combine appointments, welcoming texts and multimedia easily. Organize your internal visitor's guiding system with interesting information about your company.

screenFOOD® and DOORscreen combined - the solution for every requirement

Networked-based solution

Schedule administration available online

DOORscreen covers all the requirements of a contemporary and efficient visitor welcoming system. Appointments can be planned in advance (time control). Displays are published and updated automatically individually for each screen location. Visitors can orientate themselves using the arrow indicators to reach the room they must go to.

Individual place solution

Easy to use

This package is low budget and easy to use. Appointments can be entered easily via Excel and linked to the GRAPHIC DESIGNER. There you can create as many design templates as you wish. More demanding users can also add dynamic picture elements such as arrows or pictograms.

Individual solution

Intelligent interface function

The visitor welcoming system can be integrated into your external administration tool if required. In this way you can continue to work with your room and resource planning system and achieve innovative visitor welcoming at the same time. You can link to Exchange, SAP Campus or our standard interface, for instance.
